

Justification:

I answered 5 of the 20pt questions.

- Why is this week's topic important for teamwork?
- How do plan on contributing to the team, besides completing your tasks?
- Tell me about what you taught someone? And what did they learn, that they didn't know before?
- If you were to write your experience as STAR story, how would you phrase it?
- If this was a religion class, how would you relate this week's topic to the gospel?

This week's topic is important to teamwork because commitment is a huge part of being part of a team. If you are not committed to the team and the project that you are working on, you are failing the team. I plan on contributing to the team by helping come up with ideas for our acorn project and helping others with their assignments. Today in class I taught a group member about lists in python and how strings are different in python than in other languages. If I were to write my experience as a STAR story, I would say that the situation was that I am in a team in a class focused on python and a group member was struggling to understand a concept. My task was to help my teammate understand why their code was not working. My action was to explain that you cannot replace characters in a string in python, only in a list. The result was that my teammate finished his assignment. If this was a religion class, this week's topic would relate because we need to be committed to our covenants and to the Lord, just as we need to be committed to our teams and projects.
